

Balik kampung **STRESS?**

~ Nature answers for tranquility ~

Composure™ Liquid

Efficacy has been proven in

- Companion animals home alone (in working families with a dog or cat, the average time spent home alone by the companion animals is 9 hours per day)
- Companion animals with separation or travel anxiety
- Companion animals that require routine veterinary or grooming visits
- Puppies & kittens just weaned and/or just separated from littermates
- Puppies & kittens with excessive energy and excitability
- Show dogs & cats (increases attention span and focus while reducing anxiety)
- Companion animals demonstrating irritability or aggression
- Companion animals experiencing anxiety as a result of fireworks, thunderstorms or other natural occurrences

- Calm & relax
- Reduce excitability & anxiety
- Increase attention span
- Reduce phobia

Best of all, wide **safety** margin ...

Composure™ does not make use of any herbal ingredients. Its ingredients do not cause side effects, addiction, drowsiness or impair motor skills like some herbals (Kava Kava, Valerian, St. John's Wort, etc).

L-Theanine is very safe, showing a high LD 50 of over 5000 mg per kg of body weight. The results of acute and subacute toxicity tests and a mutagenicity test performed by a public institute have confirmed the safety of L-Theanine. Decapeptide has been shown to be non-mutagenic, does not induce adverse behavioral modification or histological alteration (sub acute toxicity), does not alter pregnancy duration or induce troubles in the physical, physiological, and behavioral or cognitive development in the young, is non-teratogenic (does not cause malformation in the fetus), and does not cause immunotoxicity.

- Non-behavioural alteration
- Non-habit forming
- Non-teratogenic
- Non-immunotoxicity
- Non-addiction
- Non-motor skill impairment
- Non-mutagenic
- Non-interruption of development in the young
