

## ENVIRONMENTAL POLICY

Rhone Ma Malaysia Sdn Bhd is committed as far as practicable, to reduce our environmental footprint which include reducing carbon emission and minimizing environmental impact of our operations through proactive and sustainable practices. Our approach is to manage key environmental aspects, including waste management, energy consumption, greenhouse gas (GHG) emissions, water usage and material sourcing.

These will be achieved through:

- Comply with all relevant environmental legislations and regulations.
- Implement an effective waste management focused on refusing, reducing, reusing, repurposing and recycling materials wherever possible. Ensuring proper disposal of scheduled and non-hazardous waste to minimize environmental harm.
- Reducing energy consumption through several initiatives including continuously monitors and manage our energy consumption.
- Identify and address GHG emissions from direct and indirect sources within our operations.
- Reducing carbon emissions associated with our operations by implementing energy-efficient practices and optimizing transportation and logistics.
- Safeguarding water resources and enhancing water usage.
- Maximize the use of renewable materials and minimizing the environmental impact across our product's entire life cycle.
- Enhance the environmental awareness and knowledge through training and programmes.
- Continuously improving our environmental performance. Conduct environmental audits and reviews.
